Guidelines

- Stripe 018° + vertical ends (parallelogram)
- Weave opacity fine 88/85% bold 128/2%
- Max 1 racing accent/stripe per layout
- Keep logo/clearspace free of chevrons
- Hairlines = structure, not decoration/spam
- Prefer carbon/bronze/silver for structure
- Ross only as thin accent bar / CTA edge
- Tilt weaves, never stretch non-uniformly
- Abstract layers at BEHIND logo stack
- Stripe ends sheared parallelogram, inset

- Preferisci stacked ice su carbon / foto scure
- Su fondi chiari: mono black / on white
- Accent racing preferred: ice wordmark + colore sul 42
- Full-color solo per livree, merch e night UI
- Clear space = 1/8 dell'altezza logo
- Non deformare, non outlineare, non usare colori fuori palette
- Minimi: stacked 120px · mark 42 = 32px · favicon = monogramma
- Abstract: stripe –18° · weave dietro il logo · max 1 accent racing
- Token: brand-tokens.json → abstract_system
